Subject: Troubleman Job Descriptions Modifications

Local 1245 has received a number of questions regarding the **modifications to the job definition of the Troubleman classification** as listed in the IBEW-PG&E tentative settlement that is intended to go into effect on January 1, 2000.

Following is Union's understanding with respect to the proposed changes:

* The changes are those as recommended by the Field Service Subcommittee. This committee, by agreement, was limited to negotiating changes only to the classifications in the Gas Service Department, Meter Readers and Troubleman.

* The changes agreed to by the parties for the Troubleman classification are limited to and intended to only reflect job duties presently performed by the classification. This is stated with the understanding that such duties are very likely not performed by all Troubleman in all locations but, in the main, are performed by the classification within the Pacific Gas and Electric system.

Please let me know if any of the foregoing does not meet with your understanding.

Thank you,

Darrel Mitchell
