MEMORANDUM OF UNDERSTANDING

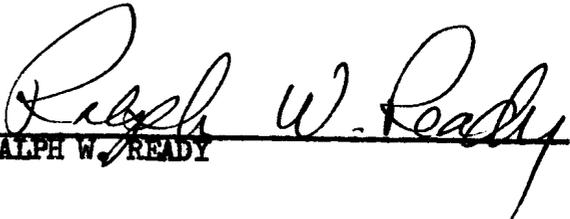

GREEN'S APPOINTMENT, Turbine Tender, Potrero Power Plant
Effective March 1, 1958

When the original eight (8) jobs for No. 4 Unit, Hunters Point, were posted for bid, Mr. Green was awarded a job as Auxiliary Operator. Mr. Green has been unsuccessful in his efforts to learn the combination electrical and mechanical features of the Hunters Point Power Plant.

The Union and Company discussed the problem of provisional bidding and agreed that in the Hunters Point Plant the provisional type of bid was not necessary. However, it was agreed that any individual going to Hunters Point without previous Hunters Point experience, who was not capable of assimilating the required job instructions, would be considered as a special case.

Since Mr. Green was unsuccessful in his endeavor at Hunters Point, it was agreed between the Company and Union to re-appoint him to Turbine Tender, Potrero Power Plant, his former basic classification.

This appointment of Mr Green to Turbine Tender, Potrero Power Plant is predicated upon the understanding that Union will not entertain a grievance resulting from the appointment of Mr. Green to Turbine Tender nor would this appointment establish a precedent under the normal bidding procedure. This appointment is to be considered a special case resulting from the start-up of the No. 4 Unit.
