Dear Mr. Mitchell:

Attached is a letter from Mr. R. L. Schultz, Line Construction Department, who is requesting a transfer to the Selma area due to health problems as confirmed by letter from his doctor, a copy of which is also enclosed.

This matter has been discussed with Mr. R. A. Storrs of your office and the transfer has been arranged. If you concur, please sign and return one copy of this letter.

Sincerely,

JAC:dc

Mr Walsh:

The following is the letter which I am furnishing at your request. Here are my personal reasons for request of transfer:

Livermore has been our home now since October 19, 1968, thats four and a half years. Since we have lived here my wife and I have suffered 10 months out of each 12 months with allergy, hayfever, and sinus troubles.

We have been taking medication and drugs for each problem. Myself having to be out in the open each day, I've had a series of test run and Dr. Stahl made up and antigen for me. I took shots every week until they did me no good any longer.

My sinus areas and the tissues in my nose remain swollen and I have difficulty at nights breathing without constant reliance on drugs. Continuance of drugs in turn causes headaches. During the day and my working hours I don't take them because they have a tendency to make you drozzy and droggy. In this work one must stay alert with full senses.

My wife also suffers with the same problems as I do only when her system can't tolerate any more drugs she breaks out in rashes.

We have a little daughter 19 months old who has our same troubles. However: her main trouble is with her eyes. All last year and this year we've had to put medication in her eyes when she's been outside in the wind because of the high concentration of things in the air which settles in this valley. We've not had these severe problems as we have now until we were sent here to Livermore four and a half years ago.

In the best interest of my job and also in consideration of my family I am requesting for transfer to Selma for these reasons. I have stated Selma because having been raised in that area neither of us have troubles there.

If you would like to personally consult with Doctor Stahl he can explain to you how some areas will effect some people while another area will do just the opposite, or discuss further in detail what was explained in his letter to you.

Respectively Yours,

Mr. Ronald L. Schultz

Re: Ronald Schultz

Dear Mr. Cooper:

Mr. Schultz has been a patient of mine since October 27, 1969. He has a history of severe allergic rhinitis associated with headaches. He has been on allergy treatment since February 1971. He has continued to have a great deal of allergy symptoms.

He has noticed that his allergic symptoms are much worse in the Livermore Valley than when he is in the San Joaquin Valley. He apparently has been symptom free in Selma, California. If transfer out of the Livermore Valley could be accomplished it would be a real benefit to Mr. Schultz's health.

Sincerely yours,

George E. Stahl, M.D.
