Review Committee File No. 212

March 15, 1960

MR. H. D. WRIGHT, Chairman
General Construction Department
Joint Grievance Committee

In the course of Review Committee discussions concerning General Construction Grievance Number 250 (R. C. File No. 212), it has been learned that the General Construction Department is willing to provide a further welding test for Messrs. Brunner and Freeman. This test would be designed to more appropriately cover the type of welding to be performed by the employees at Davis Shop and it would be given in order to determine qualifications in making an award to the job in question by Grievance Number 250.

We are, therefore, referring the grievance back to your Department for action. Please comment in your Joint Grievance Committee meeting minutes.

/s/ V. J. THOMPSON, Chairman
Review Committee
