Review Committee Files Nos. 716 and 717
Stockton Division Grievances Nos. 16-66-6 and 16-66-7
Voltage Testers - Re-fusing Distribution Potential Transformers

March 13, 1967

MR. P. E. REYNOLDS, Chairman
Stockton Division
Joint Grievance Committee

The above subject grievances were forwarded to Review on September 27, 1966. Since then, a Company member of the Review Committee has discussed the grievances with your Division Electric Superintendent.

It is our understanding that it has been the practice, in Stockton Division, for the grievants to re-fuse distribution transformers, used as potential transformers, when making voltage surveys. It is the opinion of the Review Committee that the practice should not be continued in the future.

The cases are closed and should be so noted in the minutes of your next Division grievance meeting.

L. V. BROWN, Chairman
Review Committee
