Local Union No. 1245
International Brotherhood of
Electrical Workers, AFL-CIO
P. O. Box 4790
Walnut Creek, California 94596

Attention: Mr. L. L. Mitchell, Business Manager

Gentlemen:

This letter cancels and supersedes our letter to you dated December 17, 1976, on the same subject.

Due to the increase in the cathodic protection work necessary in the Department of Pipe Line Operations and in the Divisions, Company proposes to revise the Corrosion Mechanic job definition and rates of pay in the Divisions and to concurrently establish the classification in the Department of Pipe Line Operations.

1245 Corrosion Mechanic

An employee who, without direct supervision, performs such duties as installing, checking, adjusting, operating and maintaining cathodic protection equipment and instrumentation, such as rectifiers, anodes, insulated fittings, volt-ohm-ammeters, potentiometers, recorders, and other similar equipment. This work includes performing tests verifying isolation of metallic underground structures, determining cathodic protection current requirements, determining the existence of cathodic protection interference, restoring and maintaining cathodic protection systems, and selecting cathodic protection anode locations. The employee may be required to maintain files and records, to outline work schedules, and to provide functional guidance on all of the above activities. May work alone or with the assistance of another employee. May also work with a third employee when a third employee is required for guarding manhole or vault openings or for flagging traffic.

Qualifications

Shall have successfully completed the Corrosion Mechanic Training School.
