**Review Committee File No. 481
Coast Valleys Division Grievance No. 18-63-4**

This case is withdrawn from the active Review file and Union will consider it closed.

We do not, however, consider that this action closes the issue - should a different fact situation occur or the action complained of become a repeated one. The racking of 440 volt breakers does not establish a precedent for Oilers to perform switching functions nor does it provide an expansion of duties of the Oiler classification to include the racking of breakers.
