Review Committee File No. 981
San Jose Division Grievance No. D.Gr/C 8-70-1
Work Performed by Gas T&D Helpers When
Assigned to Measurement and Control

January 28, 1974

MR. F. L. NETTELL, Chairman
San Jose Division
Joint Grievance Committee

The above-subject grievance has been discussed by the Review Committee and is being returned to the Division for settlement in accordance with the following:

The preliminary issue in the grievance has been settled with the amendment to the Gas Helpers Job Definition which allows him to assist Journeymen in operating valves. The Joint Statement of Facts does not provide enough information for the Review Committee to reach a determination as to the actual work assignments of the Helpers involved in this grievance. However, the Review Committee is of the opinion that actual assignments to Helpers while working in the measurement and control area should be limited to those described in the current job description of the Gas Helper.

This case is considered closed without adjustment and should be so noted in the minutes of your next Joint Grievance Committee meeting.
