AND VOTE

NO ON QUESTION 3

QUESTION 3 IS A HANDOUT TO BILLIONAIRES AT OUR EXPENSE.

As a union member, there's something you should know. Question 3 would deregulate Nevada's electric utility system, removing all limits on what your electric bill could be and putting millions of dollars in the pockets of the billionaires like Sheldon Adelson. Question 3 would cost jobs, dismantle protections for workers that we fought hard for, and get rid of the system that helps struggling Nevada families pay their power bills.

I'M VOTING NO ON QUESTION 3.

THREE REASONS
TO VOTE

- 1. Question 3 is backed almost entirely by billionaires** who would rather change our state's Constitution than pay their fair share for electricity. If it passes, Question 3 would help a handful of wealthy business owners at the expense of Nevada's working families.
- 2. Question 3 gives the state legislature the power** to rewrite the rules for utilities. Given their track record, they are likely to erase crucial consumer protections, like discounted rates for seniors and people with disabilities.
- 3. The current system requires very large businesses** to pay into a system that supports low-income Nevadans so they can afford their utility bills. Question 3 lets these businesses off the hook and undermines the very system that supports struggling families.
